

Protect your people and workplace

Book team flu vaccines now with us

Flu is highly contagious, and can be serious. Anyone, even fit, healthy adults can catch the flu and spread it to others. Even mild cases can result in time off work. Can you afford not to protect your team this winter?

Two easy options

Our Nurses are qualified Vaccinators. Whichever option you prefer, we arrange everything from start to finish, so it's easy for your business. Prior to the vaccination day we'll contact your nominated person to confirm details and time of arrival to ensure we meet your requirements.

1. Vaccinations on-site at your workplace

- Choose a suitable room with a table and 2 chairs where the Vaccinator and your team can be vaccinated
- Provide an on-site First Aid rep on the day the Vaccinator comes to your business. If you can't arrange or provide this we can bring our own First Aider

2. Visit our medical centre for vaccinations with a voucher

Vouchers are particularly handy for small teams in different locations, shift workers, or if team members work remotely away from the office or are travelling on the day we visit your business. Plus, you don't pay for the vouchers in advance, you only get invoiced for the vouchers used.

- We will be offering Flu vaccinations from the beginning of April - book now before the next Flu season hits
- Protection from the Flu vaccine wanes over time and strains of the Flu virus in the vaccine change every year. So even if your team have been vaccinated last year they'll need a new one every year to remain fully protected

Keep your team in the best possible health, contact us now to book early!
